

Art Marine Debris

"The Drifters Project: Plastics, Pollution and Personhood"

Lecture by artist and professor
Pam Longobardi

Join Pam Longobardi on a visual journey as she expresses the issues of marine debris and environmental conservation through her globally recognized multi-media art installations and publications.

Pam Longobardi (*Professor of Art at Georgia State University Ernest G. Welch School of Art and Design*) has presented her work in over 100 exhibitions around the world. She has received numerous awards and is acknowledged for her contributions to bring attention to the global problem of marine debris.
