Solarize Fairbanks

Area Wide Participation

Residents in the Interior are all welcome to join the Solarize Fairbanks 2023 campaign regardless of what area or neighborhood they live in.

Installer Vetting Committee

A committee with local experts, residents, and volunteers will review proposals from installers for all Solarizers, instead of selection committees for each neighborhood. Individual Solarizers will choose an installer from the vetted list.

Give Back to Your Community

Your collective participation will help installers give back to a community space, entity, or family in need.

Guaranteed 30% on your Clean Energy Upgrade

The solar Investment Tax Credit (ITC) means you will get a 30% tax credit for your solar installation. This is for residential and business installs ... more in the works for non-profit installs!

You Still Call The Shots

You choose which installer and system design works best for you! You will still receive a free assessment with no commitment to sign a contract.
