

# What is **Solarize** **BRITE?**

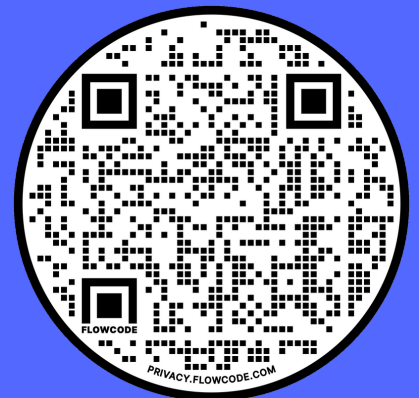

Solarize BRITE supports nonprofits in implementing resilience-focused energy efficiency upgrades and solar installs. The BRITE team, US Department of Energy, National Renewable Energy Laboratory (NREL), Information Insights, and the Solarize Fairbanks Campaign is working with local nonprofits in the Fairbanks and Denali areas. Each of these wonderful organizations is in need of energy upgrades that will provide future energy cost savings to invest back into their services. *Energy efficiency is resilience!*
